**E. Strategic approach to International Chemicals Management (SAICM)**

The Strategic approach to International Chemicals Management (SAICM) is an international policy framework to foster the sound management of chemicals. Initial capacity building activities for the implementation of SAICM objectives are supported by the Quick Start Programme (QSP). The International Conference on

Chemicals Management decided to establish a voluntary, time-limited trust fund to provide seed money to support the objective and strategic priorities of the QSP. Developing countries and countries with economies in transition are eligible for support from the trust fund. Information relevant to the QSP trust fund can be found on the following website:
